## A few examples why monitoring is important

New computer	Client forgot to install backup and security– until we noticed it by monitoring.
Network changes	Lost files - Someone changed a folder name. We see it. You save time.
IT Guy	Turned off or uninstalled security he didn't understand. We are notified and fix it.
Employees	Bothered by the anti-virus. Turned it off. We catch it.
Help Desk	Get fixes and fast answers.
